

Welcome to Werner-Heisenberg Grammar School

Our school is situated in Gröba, a borough of our town Riesa. We have got a lovely old but well-restored building and a large green school yard. About 500 pupils from forms 5 to 12 attend our school and 48 teachers work here.

WHG is well-known for its particularly good science education which is taught in several A-classes. So if you are good at maths, physics, chemistry or biology, our school would be the right choice. In our school there are many modern labs where learning can be fun and easy.

But we have also got a school canteen, a library, an assembly hall and a large gym.

You can also learn foreign languages, of course English as the first foreign language and in form 6 you can choose French or Latin.

A normal school day starts at 7³⁰ am and normally ends at 1⁵⁵ pm. But many pupils join in clubs after school for example extra maths or extra biology but you can also choose sports clubs for example volleyball. There is also a large variety of extra-curricular activities. We have got two choirs, school bands, drama clubs and art clubs.

So you see the WHG is a school offering something special for each pupil.

Furthermore we welcome foreign exchange students every year, and we even have got a twin school in Tanzania.

For further information you can visit our school at the open-door day in January where you can meet other pupils and teachers. But you can also contact us whenever you like.
